LEADTIMES AND AVAILABILITY:

All our products in the catalogue should be available within a regular leadtime, but it can vary depending on the product.

MTO PRODUCTS

Products which have the **MTO** label next to them are "made to order" so the MOQ (minimum order quantity) can be higher and leadtime can be longer.

Experience sustainability in everything we do.

SPECIALIST FOR SUSTAINABLE PACKAGING SOLUTIONS

Sustainability is an integral part of our functions that combine environmental protection, social justice and economic efficiency. Our goal is to develop more sustainable packaging solutions to meet customer demand for environmentally optimized packaging. By combining our packaging expertise and our renewable, recyclable and compostable material base, we can meet a wide range of requirements for environmentally optimal packaging.

We take every opportunity to be at the forefront of technology, materials research and new product development. Our sustainable product launches offer added value for our customers and society. We specialize in sustainable, forestry-certified fiber-based packaging with little or no plastic content and predominantly PFAS-free materials.

SUSTAINABILITY IS KEY

Made from renewable materials with a Future Smart™ plant based coating.

Manufactured using fiber or paper from renewable sources and are industrially compostable according to EN13432.

These products do not contain any plastic.

Our packaging offers advanced grease resistance without intentionally added PFAS chemicals.

SUSTAINABLE SOURCING

Raw materials sourced from sustainably managed PEFC certified forests. Proud to support sustainable sourcing and the principles of the EU Timber Regulation. No 995/2010

- All of our paperboard products are made with 100% PEFC certified paper board. (PEFC 04-31-3330)

- Wooden cutlery from FSC-certified, sustainably managed forests. (FSC paperboard can be used on request.)

IT'S ALL IN THE DETAIL!

As an innovative business we are always looking at how to make changes to our packaging to make our customers' lives easier! Changes don't have to be big to make a significant difference.

LATEST INNOVATIONS

At Huhtamaki, we want our customers to grow across grow across different markets and conditions and work successfully with them. To ensure this, we focus on responding to the megatrends and changes that impact our customers.

Huhtamaki delivers innovative solutions that help meet complex and challenging requirements to grow the market and create value for our customers. Innovation in the materials used, fast turnaround times for product development and prototyping, customized solutions for specific business needs and redesigning manufacturing processes are just some of the ways we bring leading products to market to open up new opportunities.

Perfect fit to cups

Suitable for all meal times

Recycled content

Stackable with lids

A man and a woman are smiling and looking at each other. The man is wearing a black beanie, a dark blazer over a striped t-shirt, and light-colored pants. He is holding two coffee cups in a white tray. The woman is wearing sunglasses and a dark floral dress. The background is a blurred outdoor setting with greenery.

Hot cups

Anyone for a drink?

CUPS, LIDS & ACCESSORIES

From freshly brewed coffee to creamy hot chocolate, we have the right products for you. Whether your customers are drinking at home, at work or on the go, our hot cups and lids are the right packaging for your products, wherever they are enjoyed.

We have the best cups for you to serve your most delicious hot drink. You will find the right sizes for your needs in our range. From espresso to tall lattes, we have the perfect cup. You can even have the mugs printed with your own design.

Our single-walled cups are best suited for everyday use. If you want more insulation or shine, take a look at our double-walled cups. For customers who want a coffee or other hot drink to go or delivered to their home, our double-walled cups offer an optimal S-corrugated design for improved insulation; no separate sleeve is required. This saves cost and space and reduces the number of SKUs. Most importantly, they have 25% less material compared to competitors' smooth-walled and triple-walled tumblers.

With a variety of matching lids for on-the-go, including our new fiber lids as an alternative to plastic, you're all set. Whether you're serving in a restaurant, takeaway or delivery service, we have the perfect solution.

REASONS
YOU'LL LOVE IT

**Our cups are produced and used locally
which reduces emissions from freight.**

Sustainable

INTRODUCING LOWER PE-COATING SOLUTIONS FOR PAPER CUPS.

Huhtamaki can meet the needs of our customers whilst respecting the legislation and regulation which requires plastic reduction in packaging. Our solution is paperboards for hot and cold cups which use less plastic than standard coated board.

Around the globe manufacturers and brand owners must respond to current and pending environmental legislation and public policy.

Single-use packaging products face restrictions or taxation in various jurisdictions and markets and there is strong focus on recyclability, compostability and circularity. Extended Producer Responsibility (EPR) and similar policies are being introduced to shift waste management costs partially or fully to producers and through the supply chain.

Woodland hot cups

- Our uses less plastic than standard coated board and acrylic based aqueous dispersion coatings, which are considered to be plastic.
- We achieve a minimum of 95% fiber content by product weight, or less than 5% polymer content.
- Highly pulpable and recyclable via existing waste-streams for paper cups
- Design that communicates sustainable values
- Made with 100% PEFC certified paper board. (PEFC 04-31-3330)

Introducing our new lower PE coating solutions for paper cups.

At Huhtamaki we are committed to creating new sustainable materials that are safe for food, perform well, and are recyclable or compostable. We are offering lower plastic boards and coatings for paper hot and cold cups which deliver a reduction in the amount of Polyethylene (PE) used in the lining of the cups.

This is important because it enables Huhtamaki to achieve a minimum of 95% fiber content by product weight for hot and cold cups, or put another way, we are able to offer our customers products which contain less than 5% polymer content.

Our lower plastic products are highly pulpable and recyclable via existing waste-streams for paper cups.

Need a lid? No problem. Jump to page 17.

- Weight reduction ~23% = Cost reduction (less licence fees)
- Lower environmental impact
- conservation of resources
- Reduced CO² emissions
- High functionality due to optimal material distribution
- dimensionally stable

Lighter vending machine cups, run-proof and dimensionally stable.

HUHTAMAKI'S CONVENTIONAL PLASTIC PRODUCTS ARE FAR FROM CONVENTIONAL.

Thermoforming heats materials such as polystyrene (PS) and polyethylene terephthalate (PET) as well as recycled PET into films. Pressure and a vacuum are used to mould these raw materials into the desired shape. If the packaging produced in this way is recycled, the process can easily be repeated using the same raw materials.

As part of the continuous optimisation of our range, we have not only focussed on the needs of operators and consumers with our cups, but have also placed great importance on the sustainable use of our environment.

Cold Cups

Anyone for a drink?

COLD & REFRESHING

Shakes, smoothies, iced coffee mixes and cold drinks are served in style with our wide range of clear plastic cups and lids for cold drinks. We produce a wide range of clear plastic cups for cold drinks in PET/ RPET, PLA, PP and PS. Our cups and lids are available in different sizes and shapes. Clear lids with high clarity add to the convenience when carrying the drink around.

Our cold drink cups are available in a range of attractive designs or can be customised with your own design or logo. Combined with the cold cup lids, you can enjoy cold drinks on the go.

INNOVATIVE PACKAGING

Made from rPET, a material derived from recycled PET bottles, they are recyclable, offer excellent clarity and are also crack-resistant.

BioWare™ cold drink cups and the matching lids offer the same handling functionality as products made from traditional plastic. Due to the natural material properties, the cups are suitable for use up to 40° C. Our cups have natural origin, as they are made from renewable resources and fulfil all requirements in terms of functionality, appearance and hygiene. With our Bioware range, we are pioneers in the field of compostable packaging. The Bioware cold drinks cup was the first of its kind. Bioware cups are made from the renewable Ingeo-PLA material, which is fully compostable in industrial composting facilities.

Our products are used by the world's leading foodservice and beverage brands and are recognised for their quality and ease of use.

**Our tumblers and lids are also ideal
for chilled foods and snacks!**

BioWare™ PLA Cold cups and lids

- BioWare™ cold drinks cups and the matching lids offer the same handling functionality as products made from traditional plastic. They are crystal clear, shatterproof and ideal as packaging for cold food and drinks.
- Our ecological disposable cups and ideally suited for cold beverages of any kind (due to the natural material properties, the cups are suitable for use up to 40° C)
- Our cups have natural origin (PLA made of lactic acid from sugars of maize starch) and fulfil all requirements in terms of functionality, appearance and hygiene.

PS Party Cups

The red party cups are very popular in the USA. The trend has now also arrived in Europe. The cups are becoming increasingly popular. Due to the great demand, our famous party cups are now also available in the special colours blue and white.

- Modern look thanks to embossed rings.
- More stability of the cup.
- MID-certified filling lines 200 ml and 400 ml.
- MID certification enables use not only at private parties, but also at public events.
- The 3 marked levels of the party cup provide support in terms of functionality, appearance and hygiene when mixing cocktails.

**ORDER YOUR OWN DESIGN
STARTING FROM 1000PCS IN
ONLY 15 WORKING DAYS!**

Personalised printed cups are a great way to get the brand and message across to people.

Your benefits:

- Short run personalised printed cups, easy artwork options
- High-quality all-over printing
- single & double wall cups, with different coatings, matt or gloss
- Made to order from just 1000 pcs
- Ready in 15 working days

Visit www.cupprint.com for more information.

When choosing a paper cup instead of a plastic one, we can make a huge difference in the consumption of plastic. Together let's take a look in our consuming habits and see if there is something we can do to make the earth feel a little bit lighter.

- High quality, reliable & functional
- Industrially compostable

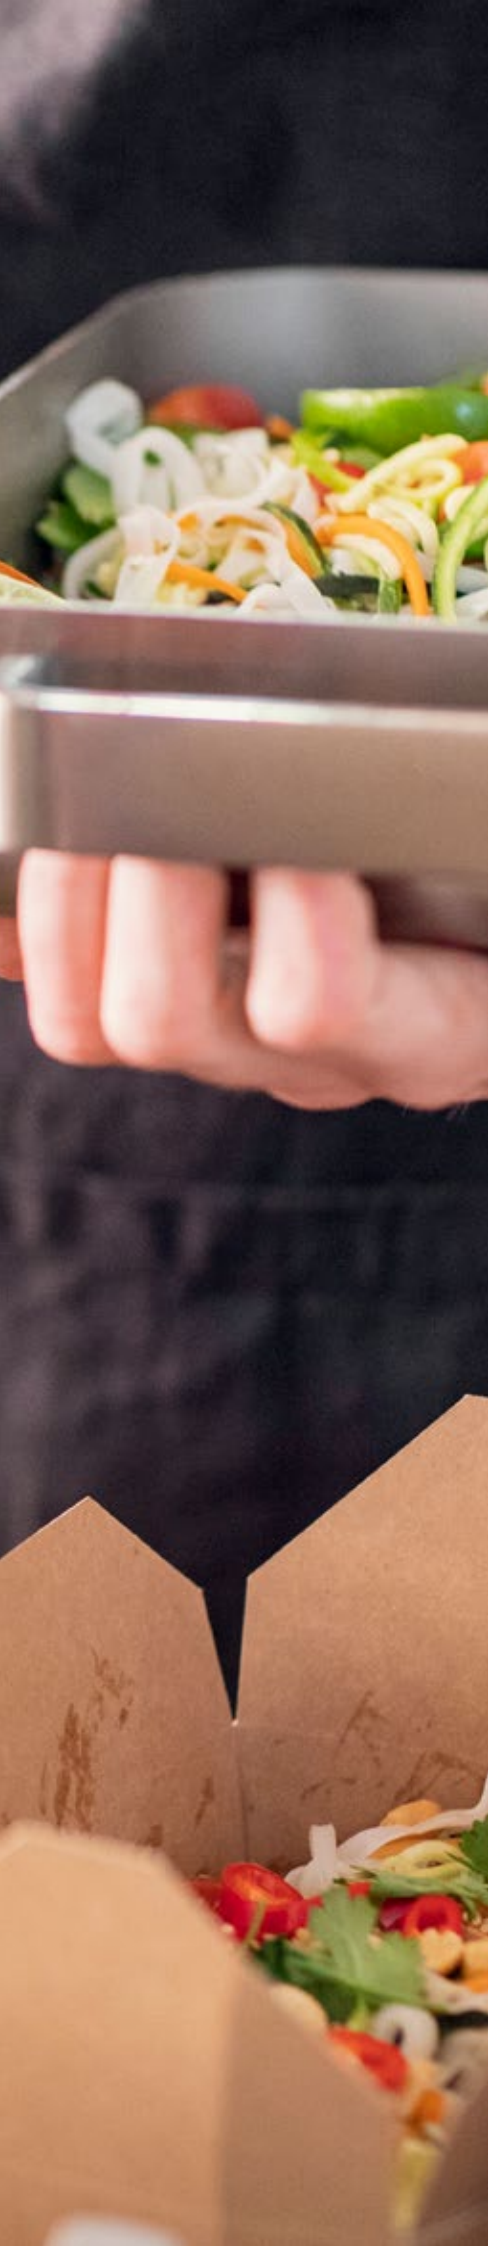

HOT FOOD PACKAGING

As consumer demand for hot food to go continues to grow, so do the opportunities for operators across Foodservice, Home Delivery, Grab & Go and Convenience sectors.

The blurring of lines between all these sections of the market, coupled with the introduction or expansion of hot food to go propositions continues to intensify. As takeaway and delivery ranges evolve, retailers are expanding fast, same day home delivery with small baskets or no minimum spend, never has it been more important for prepared meals and food to go to be a major part of their offer.

Food Containers

Served in style.

FOOD CONTAINERS AND TRAYS

Daily routines and consumer behaviours have changed, particularly the ordering, collection or delivery and consumption of meals and drinks. This has led to the introduction of new and evolving service models.

Packaging is instrumental in delivering the latest menus, drinks and treats to consumers. The functionality of the packaging is vital to enable excellent service as well as maintaining the all important quality of the food within.

Our versatile Kraft, fiber-based food boxes and trays are perfect for hot and cold meals or snacks. For serve over, hot cabinet, takeaway and delivery use. Our widespread material base and manufacturing capabilities means our range comprises different fiber based solutions.

The right kind of food packaging attracts and makes the meal enjoyable.

Fiber based packaging communicates sustainable values.

Burger & food boxes

Our one-piece fluted burger and food boxes provide excellent thermal insulation, keeping the product hot for longer (Ideal for use at the counter, for takeaway and for delivery service). A grease-repellent layer of packaging prevents the penetration of liquids into the cardboard packaging (dimensionally stable - light, strong and firm).

Our improved design has greater functionality and is made without plastic components. Microwave and oven safe up to 220°C for 30 minutes, burgers and patties can be cooked or reheated directly in the box. As the size of burgers has increased over the years, the height of our burger box is ideal for gourmet burgers.

PACKAGING CUPS

Packaging cups made from recycled PET are practical solutions for serving sauces, dips and desserts.

Huhtamaki offers a range of round, transparent packaging cups in three different sizes. Thanks to the standardised diameter, all cups can be closed with a lid variant. The robust and handy packaging cups are made from recycled PET and are in turn recyclable.

Every "superhero needs an ally". Our to-go product range therefore includes a collection of accessories such as wooden cutlery, stirrers, paper straws and paper bags, all made from sustainable materials. Your food and meals need high-quality packaging. Our range of cutlery offers great convenience and preserves flavour. With the "best of wood", Huhtamaki guarantees an economically and hygienically perfect disposable solution.

We guarantee a responsible approach to nature and our resources in the manufacture of our products. Trust our large to-go range and its variety of sustainable alternatives and solutions for frequently used food packaging needs.

A glass jar filled with wooden cutlery, including forks and spoons, is the central focus of the image. The cutlery is light-colored wood and is arranged in a way that shows various pieces. The jar is on a light-colored, textured surface. In the background, there are blurred images of food, including what looks like a bowl of salad and some bread. The overall scene is bright and clean, suggesting a focus on sustainable and practical food packaging.
